

Session Type: Energy or Non-Physical Life

Definition

The client experiences themselves as pure energy, points of consciousness or something else non-physical. This can sometimes share aspects of ET/ED Lives.

How can you tell?

Usually this becomes apparent when you start to ask the client how they see themselves in whatever environment that they are experiencing. They will say they have no form.

Basic Exploration

Looking for their purpose is usually the primary exploration. Very often it is observational only.

Suggested Questions

Where are you? (Set the Scene...big picture first, then details)

What is happening?

What is your INTERNAL landscape?

How are you feeling?

What is the story? Let's find out.

More Specific Questions for Non-physical Energy Beings

Do you have any sort of form that can be described? (some are light or color for example)

Can you communicate with others like you or other beings or ?

How do you communicate?

Are you able to move or change environments?

Are you aware of other types of realities (earth?)?

What is your purpose?

How does your existence end?

What learning/skill/understanding can you bring back to your human client?

Example of what this might be like in a session:

Where are you? - I am in space, I am in the cosmos

What are you doing? - I am exploring.

Can you describe yourself? - I am just... here... floating. Sort of a point of consciousness, just here.

Does that mean you do not have physical form? - Correct. I don't need a physical body of any kind.

Okay, why are you here? What are you doing? - I am observing. My team and I helped seed the life on the planet below us... and I am here to check on the progress.

Are any of your team here with you now? - No, I am here by myself this time

So, what are you learning so far? How is the seeding of life going on this planet? - It's going very well. My team is going to be very happy about this report.

And the session continues from there....
