

Quantum Healing Hypnosis Technique

Level 3 Recording Tips

Before you start recording, please ensure to have the **Video Release Form** signed by both the client and yourself. A copy of this form should be e-mailed to the QHHT Office.

Your instructor will provide additional information on how they prefer to receive the recordings.

Interview Requirements -

- The video recording of the interview process should be done so that both practitioner and client can be clearly heard and at least the client is in full view.
- The interview should be a separate file from the hypnosis part of the session.

Hypnosis Part of Session Requirements -

- The video recording of the hypnosis part of the session should be done so that both practitioner and client can be clearly heard. The video should include the client's entire body, so that we can see the body signs. We do not need the practitioner's body in the shot.
- Please state your name and date at the beginning of the video. Please do NOT mention the client's name.
- This video recording needs to start prior to the induction and must continue until the counting out is complete.
